

**Final Report, Office of Naval Research
Grant N00014-99-1-0216**

Research Described in Proposal Entitled
**October 1998 Internal Solitary Wave Workshop Organization and Coastal Mixing Coastal
and Optics Web Site Coordination: Expansion of ONR Grant N00014-95-1-0633**

James R. Ledwell and Timothy F. Duda
Applied Ocean Physics and Engineering Department
Woods Hole Oceanographic Institution
Woods Hole, MA 02543
(508) 289-3305, 289-2495

July 20, 2000

This grant was supported by the Physical Oceanography Program in the Processes and Prediction Division of the Ocean, Atmosphere and Space Department of ONR. The funds defrayed expenses for two activities related to our research into mixing in the coastal ocean. One was the organization of an international meeting of researchers studying nonlinear internal gravity waves throughout the world's oceans. The other was the building of a web site for the ONR Coastal Mixing and Optics (CMO) experiment, sponsored jointly by ONR Physical Oceanography and Environmental Optics.

A report on the international meeting was published as Woods Hole Oceanographic Institution technical report WHOI 99-07. The report contained papers submitted by the participants and a list of those in attendance. The papers are also published on the internet at <http://www.whoi.edu/science/AOPE/ISW98workshop/>. The workshop was held Oct. 27-29, 1998 at the Dunsmuir Lodge, University of Victoria, BC, Canada. It was organized by Tim Duda of Woods Hole and David Farmer of the Institute of Ocean Sciences, Canada.

The internet URL of the CMO site is <http://www.whoi.edu/science/AOPE/cofd1/cmo/>. The pages are securely served by the Woods Hole Oceanographic Institution. A printout of the primary page of the website is attached as part of this report. The website provides links to web areas with information and data from the various CMO investigators, and to the website for the special issue of the Journal of Geophysical Research covering the topics of coastal mixing and coastal optics.
